UC-01: Textual Use Case for FR-01 - Route Planning

Primary Actor	Passenger
Stakeholders and Interests	Not specified
Preconditions	Not specified
Postconditions	Routes are displayed with estimated costs and travel times.
Main Success Scenario	1. Passenger selects 'Plan Route' option. 2. System prompts for origin and destination. 3. System generates and displays optimized routes.
Extensions	Not specified
Special Requirements	Not specified
Frequency of Occurrence	Not specified
Assumptions	Not specified

Additional Notes

- If no routes found due to road closures, system suggests alternative paths.

UC-02: Textual Use Case for FR-02 - Ticket Purchase

Primary Actor	Passenger
Stakeholders and Interests	Not specified
Preconditions	Not specified
Postconditions	Passenger receives confirmation and ticket ID.
Main Success Scenario	1. Passenger initiates purchase request. 2. System validates input and calculates cost. 3. Transaction processed successfully. 4. Unique ticket ID generated and communicated to passenger.
Extensions	Not specified
Special Requirements	Not specified
Frequency of Occurrence	Not specified
Assumptions	Not specified

Additional Notes

- If insufficient funds detected, system provides refund options.

UC-03: Textual Use Case for FR-03 - Ticket Validation

Primary Actor	Passenger
Stakeholders and Interests	Not specified
Preconditions	Not specified
Postconditions	Access is either granted or denied.
Main Success Scenario	1. Passenger approaches the scanner. 2. Scanner reads the ticket. 3. System verifies the ticket's validity. 4. Access granted or denied based on verification results.
Extensions	Not specified
Special Requirements	Not specified
Frequency of Occurrence	Not specified
Assumptions	Not specified

Additional Notes

- If ticket is expired, system alerts the conductor.

UC-04: Textual Use Case for FR-04 - Offline Conductor Validation

Primary Actor	Conductor
Stakeholders and Interests	Not specified
Preconditions	Not specified
Postconditions	Validity result is shown to the conductor.
Main Success Scenario	1. Conductor uses the device to scan the ticket. 2. Device checks local database for ticket information. 3. Result indicating validity is displayed on the device.
Extensions	Not specified
Special Requirements	Not specified
Frequency of Occurrence	Not specified
Assumptions	Not specified

Additional Notes

- If no record found, system prompts for additional information.
