Revision History

Name	Date	Reason For Changes	Version
ali	2026-04-17	Initial generated draft for review.	1.0

1: Introduction

1.1: Purpose

Purpose: To provide a Learning Management System (LMS) for educational purposes.

1.2: Scope

Scope: The system will allow teachers to assign tasks to students and monitor their progress through quizzes. Students will have the ability to communicate with each other within the system.

1.3: Definitions/Acronyms

Definitions/Acronyms: LMS

- Learning Management System; FR
- Functional Requirement; NFR
- Non-functional Requirement.

1.4: References

References: IEEE Std 830-1998, IEEE Standard for Software Requirements Specifications.

1.5: Overview

Overview: This document outlines the requirements for a simple LMS tailored for basic educational needs.

2: Overall Description

2.1: Product Perspective

Product Perspective: The product is designed for educators and students in a school setting.

2.2: Product Functions

Product Functions: Teachers can create assignments and quizzes, grade student submissions, and facilitate peer-to-peer communication among students.

2.3: User Characteristics

User Characteristics: The primary users are teachers who need tools to manage classroom activities and students who require a platform for collaboration.

2.4: Constraints

Constraints: The system must operate without external dependencies and shall be compatible with standard web browsers.

2.5: Assumptions/Dependencies

Assumptions/Dependencies: It is assumed that all users have access to a computer or mobile device with internet connectivity.

3: Specific Requirements

3.1: External Interface Requirements

- **User Interface:** The system shall have intuitive interfaces for both teachers and students.
- **Hardware:** The system shall run on standard desktop computers and laptops.
- **Software:** The system shall support common web browsers including Chrome, Firefox, Safari, and Edge.
- **Communication:** The system shall enable real-time messaging between students.

3.2: Functional Requirements

FR-01 Teacher Assignment Creation

Input: Subject, assignment title, due date, list of students.

Processing: Generate a new assignment record with details provided by the teacher.

Output: Confirmation message displayed to the teacher.

Priority: High

FR-02 Student Task Submission

Input: Assignment ID, submission file.

Processing: Store the submitted file and associate it with the relevant assignment.

Output: Confirmation message displayed to the student.

Priority: Medium

FR-03 Quiz Administration

Input: Quiz questions, answers, scoring criteria.

Processing: Create a quiz record and make it available for students to take.

Output: Quiz results displayed to the teacher after grading.

Priority: High

FR-04 Peer-to-Peer Messaging

Input: Sender, recipient, message content.

Processing: Send the message to the intended recipient.

Output: Message confirmation received by sender and recipient.

Priority: Low

3.3: Non-Functional Requirements

3.3.1: Usability

Usability: : The interface shall be easy to navigate and understand.

3.3.2: Reliability

Reliability: : The system shall function consistently across different devices and browsers.

3.3.3: Performance

Performance: : The response time for actions shall be under 5 seconds.

3.3.4: Portability

Portability: : The application shall work on various operating systems and devices.

4: System Features

Feature 1: Assignment Management

- Teachers can create and manage assignments.
- Assignments can be graded automatically based on predefined criteria.

Feature 2: Quizzes

- Teachers can design and administer quizzes.
- Quiz results are stored and accessible to teachers.

Feature 3: Student Collaboration

- Students can send messages to each other directly from the system.

End of Document.
